SUMMARY

Computer Science Engineering graduate focused on Java backend development and currently working as a Software Intern at Monocept. Experience with Java 8+, Spring Boot, REST APIs, SQL, OOP, Collections, Stream API, Multithreading, and backend application development, supported by a strong foundation in Data Structures & Algorithms.

TECHNICAL SKILLS

Java: Java 8+, OOP, Collections, Stream API, Multithreading, Design Patterns

Backend: Spring, Spring Boot, Spring Data JPA, Hibernate, Spring Security, REST APIs, JWT

Databases: MySQL, SQL Server

Frontend: React, JavaScript, Angular, HTML, CSS, Bootstrap

Tools & Concepts: Git, GitHub, Postman, Swagger, Maven, Docker, DSA, Unit Testing, Exception Handling, MVC, Agile

Additional: C#, Python

EXPERIENCE

Software Intern

Feb 2026 – Present

Monocept

Gurugram, India

- Developing backend components in Java 8+ and applying OOP principles in day-to-day development work.
- Using Collections and Stream API to implement application logic and process data.
- Working with Multithreading and OOP design patterns while contributing to Java backend tasks in an Agile team.

Software Developer Intern

Jan 2025 – Aug 2025

Anviam Solutions Pvt. Ltd.

Mohali, Punjab

- Developed 6+ backend modules and worked on API development, authentication, and database-driven features.
- Implemented JWT-secured REST APIs and documented endpoints with Swagger.
- Optimized SQL Server queries and stored procedures, improving API response time by 30%.

Student Placement Coordinator

Feb 2024 – Jul 2025

Gulzar Group of Institutes

Khanna, Punjab

- Coordinated 10+ placement drives involving 2,000+ students across multiple domains.
- Built Excel-based automation for candidate data and scheduling, improving efficiency by 25%.

PROJECTS

Insurance Policy & Claim Management System | Java 17, Spring Boot, Spring Security, React, MySQL 2026

- Built a full-stack insurance platform with ~60 REST endpoints, 16 entities, and 3 role-based workflows for policy and claim management.
- Developed backend services with Java 17, Spring Boot, Spring Data JPA, and Hibernate, with JWT-based authentication and role-based access control.
- Implemented business rules for premium payments, duplicate-policy checks, claim eligibility, audit histories, and document-based claim submission.
- GitHub: Insurance Policy & Claim Management System

Department Expense Approval System | Java, Spring Boot, Spring Data JPA, React, MySQL 2026

- Built an expense approval workflow for employee submissions, finance review, approvals, and department budget tracking.
- Used Spring Boot, Spring Data JPA, and MySQL for the backend, with React dashboards for analytics and financial reporting.
- GitHub: Department Expense Approval System

EDUCATION

Gulzar College of Engineering

Ludhiana, Punjab

B.Tech – Computer Science and Engineering (IoT & Cyber Security with Blockchain)

Jun 2021 – Jun 2025

- Overall CGPA: 8.16 — Appreciation Award – Highest Score in Department
