PROFESSIONAL SUMMARY

Software Developer with 1+ year of experience specializing in Java, Python, and .NET backend development, delivering 6+ optimized modules, REST APIs, and role-based workflows for enterprise applications.

TECHNICAL SKILLS

Languages: Java 8+/17, Python, C#, JavaScript, SQL

Backend: Spring Boot, Spring Data JPA, Hibernate, Spring Security, ASP.NET Core, Entity Framework Core, Flask, REST APIs, JWT

Databases: MySQL, SQL Server, Oracle (Basic)

Software Engineering: OOP, Collections, Stream API, Multithreading, Design Patterns, MVC, Clean Architecture, RBAC, Exception Handling, Logging, Unit Testing, API Versioning

Tools & Practices: Git, GitHub, GitLab, Postman, Maven, Docker, Swagger/OpenAPI, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Developer

Feb 2026 – Present

Monocept Consulting Pvt. Ltd. | Gurugram, India

- Developed Java 8+ backend components using OOP principles for application development and data-processing workflows.
- Leveraged Collections and Stream API to implement application logic and streamline data-processing operations.
- Integrated multithreading and OOP design patterns into Java backend tasks within an Agile development environment.

Software Developer Intern

Jan 2025 – Aug 2025

Anviam Solutions Pvt. Ltd. | Mohali, India

- Delivered 6+ backend modules using ASP.NET Core and Entity Framework Core, following MVC and Clean Architecture principles.
- Engineered JWT-secured REST APIs and presented Swagger/OpenAPI documentation to 15+ development teams for application integration.
- Optimized SQL Server queries and stored procedures, improving reported API response time by 30%.

Student Placement Coordinator

Feb 2024 – Jul 2025

Gulzar Group of Institutes | Khanna, India

- Coordinated 10+ placement drives involving 2,000+ students across multiple hiring domains, communicating updates to university stakeholders.
- Automated candidate-data and scheduling workflows using Excel/Python, improving administrative efficiency by 25%.

EDUCATION

Gulzar College of Engineering

Jun 2021 – Jun 2025

B.Tech, Computer Science and Engineering (IoT & Cyber Security with Blockchain)

Ludhiana, India

CGPA: 8.16

PROJECTS

Insurance Policy & Claim Management System

2026

- Architected a full-stack insurance platform with ~60 REST endpoints, 16 entities, 17 tables, 13 controllers, and 3 role-based access levels.
- Enforced stateless JWT authentication, RBAC, refresh-token security, rate limiting, and protected application workflows.
- GitHub: Insurance Policy & Claim Management System

Department Expense Approval System

2026

- Designed an employee expense workflow spanning submission, finance review, approval, and department budget tracking.
- Collaborated with engineering teams and presented the solution to 15+ stakeholders, covering role-based workflows, review queues, budget tracking, analytics dashboards, and CSV financial reporting.
- GitHub: Department Expense Approval System

Sentiment Analyzer – Python

2025

- Created a machine-learning sentiment analysis application classifying text as positive, negative, or neutral.
- Utilized NLP preprocessing, model training, and evaluation to develop the classification pipeline.
- Created a Flask-based web interface for real-time sentiment prediction.
- GitHub: Sentiment Analyzer

ACHIEVEMENTS

GeeksforGeeks 60-Day POTD Challenge: Completed daily Data Structures and Algorithms problems covering arrays, intervals, sorting, prefix sums, and custom comparators.
